

**Amendments to the Claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claim 1 (original): A food-grade insecticidal composition comprising an amount of D-limonene sufficient to provide insect control, a non-toxic hydrophilic solvent, an amount of a non-toxic emulsifying agent sufficient to solubilize D-limonene in said non-toxic hydrophilic solvent, wherein the emulsifying agent is non-toxic to humans.

Claim 2 (original): The insecticidal composition according to claim 1 comprising about 1% to about 20% by weight of D-limonene, about 1% to about 25% by weight said non-toxic emulsifying agent, and about 98% to about 55% by weight of said non-toxic hydrophilic solvent.

Claim 3 (original): The insecticidal composition according to claim 1 further comprising an amount of at least one food-grade preservative sufficient to extend the effectiveness of said insecticidal composition.

Claim 4(original): The insecticidal composition according to claim 3 comprising about 0.01% to about 5% by weight of said preservative.

Claim 5 (original): The insecticidal composition according to claim 1 wherein said amount of D-limonene sufficient to provide insect control is sufficient to repel an insect.

Claim 6 (original): The insecticidal composition according to claim 1 wherein said amount of D-limonene sufficient to provide insect control is sufficient to kill an insect.

Claim 7 (original): The insecticidal composition according to claim 1 wherein said non-toxic emulsifying agent is a polyethoxylated castor oil.

Claim 8 (canceled)

Claim 9 (original): The insecticidal composition according to claim 1 wherein said non-toxic hydrophilic solvent is water.

Serial No. UNASSIGNED

Preliminary Amendment

Claim 10 (original): The insecticidal composition according to claim 2 wherein said preservative is a food preservative.

Claim 11 (original): The insecticidal composition according to claim 1 which controls at least one insect selected from the group consisting of ants, aphids, mealy bugs, white flies, spider mites, leaf hoppers, cabbage loopers, leaf eating beetles and caterpillars, cockroaches, flies, wasps, body lice and head lice.

Claim 12 (original): The insecticidal composition according to claim 1 comprising about 1% to about 10% by weight of D-limonene, about 5% to about 15% by weight of a non-toxic emulsifying agent, and about 94% to about 75% by weight of a non-toxic hydrophilic solvent.

Claim 13 (original): A method of making an insecticidal composition comprising the step of combining an amount of D-limonene sufficient to provide insect control with a non-toxic hydrophilic solvent and an amount of a non-toxic emulsifying agent sufficient to solubilize D-limonene in said non-toxic hydrophilic solvent, wherein all said ingredients are food-grade.

Claim 14 (original): The method of claim 13 comprising the step of combining about 1% to about 20% by weight of D-limonene, about 1% to about 25% by weight of said non-toxic emulsifying agent and about 97.99% to about 50% by weight of said non-toxic hydrophilic solvent.

Claim 15 (original): The method of claim 14 wherein said solvent is water.

Claim 16 (original): The method of claim 14 wherein said ingredients are combined with about 0.01% to about 5% by weight of a preservative.

Claim 17 (original): A method of controlling insects comprising the step of applying the insecticidal composition of claim 1 to one selected from the group consisting of an insect, an insect trail, an insect nest, a building surface, a building perimeter, and a plant.

Claim 18 (original): The method of claim 17 wherein said insects to be controlled are on plants.

Claim 19 (original): The method of claim 18 wherein said plants are selected from the group consisting of rose bushes and ornamentals.

Serial No. UNASSIGNED

Preliminary Amendment

Claim 20 (original): A method of treating a human infected with lice comprising the steps of applying the composition of claim 1 to a portion of the human infected with the lice, allowing said composition to remain on the infected portion for a period of time and removing said composition.

Claim 21 (original): A food-grade insecticidal composition comprising about 0.7% to about 1.5% by weight of D-limonene, about 1% to about 25% by weight of a castor oil and about 98% to about 55% by weight of a non-toxic hydrophilic solvent.

Claim 22 (original): The insecticidal composition according to claim 21 further comprising an amount of at least one food-grade preservative sufficient to extend the effectiveness of the insecticidal composition.

Claim 23 (original): The insecticidal composition according to claim 22 comprising about 0.01% to about 5% by weight of said preservative.

Claim 24 (original): The insecticidal composition according to claim 21 comprising about 0.775% D-limonene.

Claim 25 (original): A method of eradicating fire ants, comprising:  
applying a formulation to an area to be eradicated of fire ants, wherein said formulation consists essentially of about 0.7% to about 1.5% D-limonene, about 1% to about 25% by weight of an emulsifying agent, and about 98% to about 55% by weight of a non-toxic hydrophilic solvent; and  
allowing said formulation to remain in contact with said area for a suitable period of time to eradicate said fire ants.

Claims 26 (canceled)
